"The Way of All Flesh"

with Emil Jannings

YOU ask for strong drama—fine acting—powerful direction. Well—here is Jannings, the screen's emotional giant, as he who dared to defy—a man who goes THE WAY OF ALL FLESH. A characterization you'll never forget! The drama you'll always remember!

THIS WEEK

"Publicity Madness"

Coming Next Wed., Apl. 4

"CAPTAIN SALVATION"

Dramatic Recital By Miss Hummon

Under the auspices of the O. E. S. Miss Ina Mae Hummon will give a dramatic recital of "Mary Jane's Pa", a play in three acts by Edith Ellis, in Campbell's hall on April 5th. Miss Hummon is a graduate of the Boston School of Dramatic Art and has given this recital to crowded houses in Lethbridge and Carmangay so that Championites may rely on spending a splendid evening on her visit here. Admission to the recital is 60 cents and the doors open at 8.00 p.m. There will be a dance after the recital for which the Johnny Anderson orchestra will supply the music.

Local and General

R. C. Crane's auction sale was postponed on Tuesday owing to the snowstorm.

Jes. Maughan, of Lethbridge, is making a drill test for coal on J. Roebuck's farm. He will go down 500 feet in the test.

Mr. and Mrs. H. C. Jopling have moved from the Beaubier residence to the house formerly occupied by Herbert Gill.

Farm implements of every description are now in demand and are moving to the farms in increasing quantities daily.

Mr. and Mrs. H. Higgins moved last week from Mrs. Barker's residence in the subdivision to Mrs. Linton's former home.

Scarlet fever patients are all reported as doing well, in fact only the quarantine regulations are keeping them from being at large.

W. H. Bowman recently received a shipment of 400 stocker cattle for his ranch east of the valley. The cattle were unloaded at Carmangay.

An exodus to the farms by those who have spent the winter in Champion is in progress, but every vacancy in the town houses is filled at once.

Oscar Sletto has purchased Jas. Burnett's farm and in consequence the latter is holding auction sale on April 2nd. Note reference to this sale elsewhere in this issue.

The snow storm on Tuesday sent hopes of an early resumption of threshing glimmering. It is evident now that some time must elapse before there any hope of saving the grain in stock.

Mr. and Mrs. J. N. Beaubier and Mrs. Barker returned from California last Thursday. While away they visited many friends and relations, among those being Mrs. Earl Beaubier, of Spokane.

Mr. and Mrs. E. F. Crawford, who are moving from their residence, which has been purchased by E. Latif, entertained a large number of their friends during the week.

Oscar Sletto has purchased the Burnett farm of three quarter sections, the price paid being reported at \$50.00 per acre. It is regarded as one of the best farms in the district, being nine miles west of town.

The Ladies' Aid will serve an Easter tea and hold a bazaar sale in the church on Saturday April 7th. Donations for the purpose will be gladly accepted and the proceeds will be utilized for improvements in the interior of the church, including pews. Everyone cordially invited to attend both tea and sale.

Auction Sale Postponed

R. C. Crane's postponed auction sale will be held on Wednesday, April 4th, commencing at ten o'clock. The offering include the complete equipment of Mr. Crane's farm and will provide an excellent opportunity for anyone desiring additional horses or machinery for spring work.

Women's Institute Meeting

The Women's Institute will meet on Tuesday, April 10th, at the home of Mrs. E. C. Alecock. Roll call will be responded to with "Garden Hints." The report of the official delegates to the District Conference will be heard, and a paper on "Agriculture" by Mrs. W. Ulrich will also be a feature of the meeting. Refreshment convenor, Mrs. Miffin. Everybody welcome.

United States financiers invested \$475,453,200 in Canada in 1927.

Anderson Bros. are renting their land east of town, according to report.

FOUND—Ladies' dress between Frank Smith's and Oscar Simonson's. Apply at Chronicle office.

S. Y. Taylor, secretary of the Masonic Grand Lodge of Alberta, died at his home in Calgary this week.

Another siege of scarlet fever would appear to be about over and with no new cases for the next few days several families will again be reunited.

Work has been started on the new flume on the Canada Land Co's ditch east of Chamagay. About 20 men will be employed on the job.

K. R. McLean, 210-212 Herald Bldg, Calgary, sight specialist wishes to announce that he will visit Champion, at the drug store Friday, March 30, 1928.

The new hall is the topic of greatest interest in town at the present time. It is reported that \$2,000 was volunteered for the proposition. With a canvas completed this amount would easily be trebled in town.

Mrs. Ditto, mother of Irl L. and O. C. Ditto of Champion, died on Monday, March 19th, at Spokane, Wash., of pneumonia, shortly after her sons arrived at her bedside. The funeral took place on the Thursday following.

Mrs. O. Harper was a tea hostess on Wednesday afternoon, the guests being the lady members of the Order of the Eastern Star. The function was largely attended and everyone was loud in their praise of the splendid entertainment.

While the effects of the last snowstorm are disappearing rapidly it will be some days before the water will again disappear from the roads and the streets. It is to be hoped this is the last evidence we will have of March going out like a lion.

We have no hesitation in hoping Mr. Maughan finds a big vein of anthracite coal in the test he is making. Then when we find oil on Fath's bill we will have nearly all the accessories necessary to rapid and substantial growth, and a \$10,000 town hall will look small indeed.

The Savoy hotel is to be finished with stucco instead of being painted, as soon as interior improvements are completed. This will make it the finest hotel between Calgary and Lethbridge, and undoubtedly the best in a town of this size in the Province.

By Ordering Your New Spring Suit and Top-Coat NOW

We can save you ten to twenty dollars. This extraordinary pre-seasonal offering is made possible through the co-operation of Semi-Ready Ltd.

We are just in receipt of a book containing ninety samples of the finest English and Scotch Suitings and Topcoatings we have seen in many a day. We are positive you can find here a fabric that will appeal to your taste. Suits and Topcoats as low as

Old Hickory Salt

For Your Meat

A Better Cure

A Finer Flavor

What Is Old Hickory?

It is simply a high grade meat salt—Smoked with genuine hickory wood smoke. The manufacturers, The Smoked Salt Company, take genuine hickory wood, burn it in an open fire just as the farmer does in the smokehouse. This hickory wood smoke is first passed thru a mechanism which removes all soot and then thru a chamber with pure meat salt. Thus the salt is smoked and nothing else is added.

NOTES AND COMMENT.

The proposal of the Champion Elks Lodge to take the lead in reviving the community hall idea is worthy of the very best support of everyone interested in this vicinity. It matters little where the credit in the matter lies. To secure the hall should be the ambition of every citizen, regardless of where the incentive comes from. The Elks have naturally the best organization to deal with a matter of this kind as their membership has no sectarian views and in consequence they are in a position to unite the supporters of the hall more easily than any other order outside a purely community organization. There is little doubt in anyone's mind that this matter can be brought to a successful issue at the present time if it is taken up in the proper spirit. We need a good hall and its promoters are worthy of every consideration.

The movement from horses to power on the farms seems to be general all over the country this year and will no doubt continue in the future. The extent of this movement this year is surprising, as there was naturally horse power nearly sufficient, at least, to handle the work in sight, and the very extensive additions in the way of power equipment would indicate a general effort to do more work on the land than ever before. The presence of a large amount of threshing this spring in addition to the regular seeding operations has undoubtedly had considerable to do with the additions to equipment. It is to be hoped, however, that the change to power will be made without unnecessary loss in disposing of the present horse equipment.

C.G.I.T. Takes Up First Aid Work

After the St. Valentine's ten, the Excelsior C.G.I.T. group decided to take up First Aid. At the first meeting a course of study was planned and different parts assigned to each member. Miss Smithson gave a demonstrative talk on the bandaging of wounds at the next meeting. The second topic of study was how to change a bed with a sick person in it. On this subject Mrs. Bastin gave a very interesting and helpful demonstrative talk. The group spent another meeting in discussing what they had so far taken up. On March 7th each gave a talk on the treatment of the following:

- Headaches—Freda Bastin.
- Bleeding of the arteries and veins—Phyllis Boden.
- Foreign bodies in the eye, ear and nose—Ena Gill.
- Nosebleeds—Retha Higgins.
- Suffocation—Gretchen McNaughton.
- Poisoning—Elsie McLean.
- Fainting—Annie Shum.

At the last meeting Mrs. Freeze gave a very interesting

talk on First Aid. From this the girls gained a practical knowledge of how to treat—shock, snakebite, fainting, how to make a stretcher from coats, how to give artificial respiration, etc. The group has found that the time used in taking up this helpful topic, has surely not been wasted, and that they will find the knowledge very useful.

FRIENDLY cushions, fashioned with the comfort of an easy chair, invite relaxation as your McLaughlin-Buick sweeps smoothly along.

Comfort that invites Relaxation

In the designing of McLaughlin-Buick for 1928, riding ease and comfort have been given unusual consideration. Lovejoy Shock absorbers on all four wheels absorb and cushion every road-shock and rebound. Rubber Engine Mountings prevent vibration from reaching the car-body. Extra deep, resilient seat cushions, beautifully upholstered, are specially shaped and tailored to fit, like an easy chair. The lower body-lines have been attained without any sacrifice of headroom. And in finish and appointments, McLaughlin-Buick establishes a standard of luxury which vies with your drawing-room or club. The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

A "Want" Advt.

Dr. Seager Wheeler Tells About Development of A New Rust-Resisting Wheat

In further explanation of his development of a new wheat from the Kots strain, which promises to be rust resistant to a degree not approached by any other wheat, Dr. Seager Wheeler, of Ioshtern, has given a statement on his experiments. He says he started with the Kots type, which is famous for its rust resistant qualities, but is also noted for a weak straw and poor milling qualities. This variety of wheat is also of the hard end type. In 1921 Dr. Wheeler found that among his plots of Kots wheat there were two heads of the beardless class, although positive that it would have been impossible for any other class of wheat to have become mixed with this plot.

Believing that, by that accident of nature, the natural cross, that he had something new, Dr. Wheeler kept these two heads separate and saved the seeds in a separate plot. This was in 1924. In making the miniature harvest of his plots, he noticed that the product of this new experiment plot had broken up into several distinct forms of types, each different from one another, but only noticeable to one who had spent years in the wheat study.

Each of these different strains was planted in separate plots in 1925, and again divided into the end of the year Dr. Wheeler was able to count 60 different varieties of his original product, derived from his two heads. Many of these plots, apparently not been infected by the rust of 1925.

The following year, 1926, there was practically no rust, consequently experiments carried on in this year could not demonstrate the ability to fight the enemy of the farmer. However it was shown that a grain similar to that of Kots, with beardless heads, with straw of a much stronger description and with milling qualities were much superior to that of the original strain had been developed.

Not content with this, Dr. Wheeler again carried on his series of experiments last year, and in it as a result of these, carried on in the present year, he was able to announce definite results, he said.

Sowing about 50 selections of his original strain, he found that the seeds taken from the Kots product were more successful in warding off the damaging attacks of rust. On all sides (for the experiments plots of this untiring scientist reach far aces) were plots of other types of wheat that he was testing. Each showed but little damage. Small spots of rust were seen on the leaves but the seeds were fully developed and not damaged in the least, he said.

When questioned in regard to the future of this wheat, Dr. Wheeler said that he intended to continue his experiments, and believed that by careful selection and observation he would soon be able to give to the world a wheat that although not guaranteed against rust, would be so little affected by that that the damage could be discounted.

Dr. Wheeler pointed out that he was not announcing that he had a wheat that was immune from rust attacks. He mentioned that in the past others had announced that they had a wheat of this type, consequently disappointing those whose livelihood depended on their crops, and that he had a wheat which is definitely expected to prove sufficiently rust resistant to greatly lessen the danger of loss by rust.

Dr. Wheeler has been growing and experimenting with wheat in Saskatchewan for the past 10 years. In addition to developing such an early ripening wheat as Red Bobs, and carrying on endless experiments in cereals, Dr. Wheeler has an orchard and on his small farm, three miles east of Ioshtern, in which he grows practically all types of fruit with the exception of those which only arrive in tropical countries.

Experiments with Kots wheat to develop a rust resistant type are being carried on by Dr. Wheeler at the head of the University of Saskatchewan, also at Ottawa and in rust research bureaus at Winnipeg and elsewhere. Professor Wheeler states that some of the selections being experimented with at the University show fair promise of proving of value to prairie farmers.

Grain Mixtures For Hogs

Several Grain Mixtures For Hogs Of Different Ages
A number of experiments in feeding hogs have been conducted at the Nappan, Nova Scotia, Experimental Station. Based on observations made during these tests, the superintendent recommends several grain mixtures for hogs of different ages. From weaning time to three months of age, either or bullock oats 1 part, middlings 2 parts, and 5 per cent of oil meal may be profitably added. For hogs from three to five months old, oats 2 parts, barley 2 parts, and 1 part bran and oil meal 5 parts. For summer feeding hogs of this age when on green feed the grain mixture might be oats 2 parts, shorts 2 parts and barley 2 parts. For the finishing period a good grain mixture is oats 2 parts, barley 2 parts, and shorts 1 part with 5 per cent of oil meal. In all these rations the grains should be finely ground.

Icelanders Now Cultivating Soil

People Just Recently Have Become Interested In Farming
Icelandic agriculture is entering a new phase. Rational cultivation of the land is now a national slogan, while formerly there was little cultivation of the soil.
The surroundings of Reykjavik afford a striking example. Land reclamation has gone on for some years. Hogs have been changed into green pastures, and all kinds of agricultural experiments have been undertaken, some with great success.
Things that Icelanders themselves had sworn would never be able to grow, thrive wonderfully well.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which has been in existence for some time, is now in a position to take action against the publishers of the city. The union has been successful in securing a number of concessions from the publishers, and is now in a position to take action against the publishers of the city.

Had Heavy Debt

The Ross was tired of being constantly importuned by one of the workers for the next week's salary, and finally said:
"More, you're the limit. Say, what would you do if you had all the money in the world?"
"Well, said," replied Moss, "I'd do it as fast as I could."

Homesteads Covering 43 Years

According to the Department of the Interior, 475,352 homestead entries were made between May 1873 and March 1917. In the last fiscal year, 5,560 homestead entries were granted. Of these 1,819 were made by residents of various provinces of Canada; 874 by persons from the United States and 662 by persons from the British Isles.

School Shortages For The Young Girl

The present promise that you can learn how smart a school frock can be when made from flannel, with just the right touch of contrasting color used for collar, cuffs and belt. Mining in the West

Trail Deposits in Alberta Are to Be Developed
"Manitoba is rapidly rising in importance as a mining province," it is said. L. Lundquist, chairman of the mining bureau of the Winnipeg board of trade and director of the industrial development board of Manitoba, remarked in Montreal recently on his way to the annual meeting of the Canadian Institute of Mining and Metallurgy, which was opened at Quebec, "In fact, the bulk of the whole has little realization of the strides being made by Manitoba in directions other than agriculture, and especially in mining," continued Mr. Lundquist.
An important present development in the west, mentioned by Mr. Lundquist as shortly to materialize, is that in connection with large deposits of iron ore, both of the blue and white variety, in Alberta, about 15 miles from Banff, the blue was quite rare, he said, and was used chiefly in the making of electrical laminators and gas burners, while the white was very pure in the region referred to, was the raw material for face powders.

A Remarkable Cow

Wetaskwin District The House Of Record Breaking Shorthorn
Wetaskwin district has the distinction of being the home of a Shorthorn cow which holds the record for all Canada in the production of milk and butter for a three-year-old. The cow, owned by J. O. Harvey in the northwestern part of the city of Wetaskwin, and a letter from Ottawa advises that the production of this cow never exceeded in Canada. Gladys No. 20099 produced 15,044 lbs. of milk and 560 lbs. of butter fat in a test extending over 365 days. She is now undergoing her test on a four-year-old and is averaging about 58 lbs. of milk a day.

Revenue From School Lands

Nearly Two Million Dollars Collected By Federal Government In Saskatchewan Last Year
Revenues from Dominion and school lands in Saskatchewan during the fiscal year 1926-27 amounted to nearly \$2,000,000, according to a report of the Federal Department of the Interior. Revenues originating in this province, chiefly through agencies at Prince Albert and Moose Jaw, amounted to \$964,231.69 on Dominion lands, Crown timber, forestry, water power and reclamation, mining and national parks. School lands revenue amounted to \$103,428.

Feeding Young Turkeys

Must Not Be Fed At All Until 18 Hours Old
Some good advice on the feeding of poults is given in a Dominion Experiment Station bulletin on turkeys. According to the bulletin, the heavy turkeys should not be fed at all until they are at least 48 hours old, and even after 48 hours without feed is not too long. The first feed, given in the morning, should be chick size oyster shell scattered on a small board, and a few skim-milk towards the end of the afternoon they should be given some hard boiled eggs chopped fine. Regular feeding should be started the next morning with hard boiled eggs and bread crumbs mixed together and given three times daily. After one week the egg may be gradually discontinued and the feed consist of bread alone. After the second week a little moldy shorts are added, discontinued the crumb until the shorts alone are used. All these changes should be made gradually. Bore mites, egg and oyster shell should be given daily from the start. Never ever feed or offer anything that has been mixed for previous feeding. As the poults grow they will need a wider range until very little feeding is necessary. The bulletin, which deals with the care and management of turkeys, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Growing Flax For Fibre

May Be Harvested By Cutting Instead Of Pulling

The slow work of flax has been made in the growing of flax in Canada for three years has due to a considerable extent to the old idea that the flax plants have to be harvested by pulling. Experiments in harvesting at the Experimental Farm at Ottawa indicate that flax is harvested by cutting can be made into a high grade tow. By harvesting the crop in this way one of the most expensive items of culture is largely overcome. The significance of this conclusion is that flax may be grown over a very wide area of Canada and not confined as it has been largely in the past to districts where Indian labor could be secured cheaply to pull the crop.

Ranching In B.C.

Cattle Ranching Said To Be Getting Back To Its Old Stride

The cattle ranching business in British Columbia is getting back into its old stride and the future of the industry is bright in the opinion of C. G. Cowan who, in addition to his own extensive interests in cattle ranching in Carleton, is agent for the Marquis of Exeter and Lord Egerton of Southport. Arrangements are being made to carry several thousand additional head of cattle, while 2,000 sheep are to be introduced from Oregon this summer. Altogether Mr. Cowan estimates his companies will buy at least \$200,000 in purchases of additional stock.

Horse Meat For Belgium

A market is being found for the carcase of the Okanagan, which are being rounded up in the hundreds by the Government. A Battle, Monaghan meat firm is taking 700 of them, to be slaughtered at Platte, it is said, and the hams pickled and sent to Belgium.

Slogan for suppressing a Latin-American revolution: "Shoot the general and you shoot all."

Canada Spends Huge Sums In Construction and Maintenance Of Good Roads Coast To Coast

New Park Encloses Forty Townships

Prince Albert Park in Northern Saskatchewan Area of Varied Beauty

Approximately forty townships are enclosed by the boundaries of Saskatchewan's new National Park in square miles the area is slightly more than 1,400, which makes the park comparable in size to Glacier National Park in the United States. Prince Albert Park, as it has been called, lies no more than 30 miles north and northwest of the city of Prince Albert, which is on the line of the Canadian National Railway and will be easily accessible from Saskatoon, Regina and other large centers.

Surrounding, as it does, three large lakes—Waskia, Little Trout and Big Trout—taking in many smaller ones and extending for miles along the eastern shore of Montreal Lake, the park is a land of varied beauty. The valleys, with their soft, fertile, are beautiful and clear and are edged, in many spots, with clean white sandy beaches. All the lakes are connected by streams which make it possible for the vacationist to wander for days by canoe or motorboat. The forest is a mixture of evergreen, pine, spruce, tamarac, poplar and birch.

In all respects it fulfills the objective of the parks branch of the Dominion Department of the Interior—the permanent preservation of regions of outstanding beauty in their natural state, as a conservation of plant and tree life from commercial exploitation and fire hazard and conservation of game. The new park provides and protects a large area of Saskatchewan's best forest and lake country, and the road development which has been planned will under the farthest corners accessible to those seeking health, recreation and data for scientific studies.

Yukon's Healthful Climate Is Most Delightful From May To October

The climate of the Yukon Territory, Canada, is characterized by extremes in temperature and humidity, and is one of the most delightful climates that is available from May 1 to October 1. The continuous light for the whole twenty-four hours, during the period from the middle of May to the first week in August, although many of the tourists avail themselves of this provision of their country's law, and so contributed to the volume of business done last year by Canadian traders. Furthermore, it is probable that many of the tourists helped on their return home to advertise Canada's attractions as a summer resort, its resources and the opportunities it offers for the investment of capital.—Toronto Mail and Empire.

Prairie Fruit Fruit

Experiments With Different Varieties Of Fruits Meeting With Success

Efforts to produce by cross-pollinating different varieties of fruit which will be "comfortable" to the Prairie Province farmers, are meeting with an increasing measure of success, according to the superintendent of the Dominion Experimental Farm at Morden. Fruit plantations bearing well-flavored yields will soon be the rule instead of the exception, he said.

Getting Out A Paper

Getting out a paper is no picnic. If we print facts, folks say we are silly. If we don't, they say we are too serious. If we publish original matter, they say we lack variety. If we publish things from other papers, we are too busy to write. If we are running news, we are not attending to business in our own department. If we don't print contributions, we don't show proper appreciation. If we do print them, the paper is filled with junk. Like so, some fellow will say we published this from another paper. We did—and we thank him.—Dental Craftman.

Up to the end of December, 1927,

the total wheat exports from Canada for the preceding five months amounted to 1,121,250 bushels valued at \$185,632.90 as compared with 1,381,118 bushels valued at \$194,546.01 for the same period in 1926.

Type measures rolled in a ball of cloth now tell salmoners how many fish remain in the hole.

"I must appear ridiculous like this."

"No, no. It shows that you will be very useful for cleaning the floors."

—Fogus Cakes, Yverdon.

There are now in Canada more than 150,000 miles of improved roads that are kept in good condition during the touring season, and in some districts during the winter months as well. In addition there are thousands of miles of roads of less costly types that are suitable for motor travel. The construction and maintenance of all these roads have cost the Canadian an enormous sum of money. Highway improvement projects undertaken in co-operation by the Dominion Government and Provincial Governments under the Canada Highway Act of 1917 covered only 4,688 miles of the total road mileage of the country. Yet they involved a total investment of almost \$40,000,000, which the Dominion Government to pay \$19,296,288, and had paid \$18,775,004 up to the end of March, 1927. Expenditures made for road construction and maintenance throughout the Dominion amounted in the year 1926 to \$45,000,000, of which almost \$10,000,000 represented the cost of upkeep. Furthermore, there is reason to believe that expenditures of the kind will continue.

The Canadian people's investment in good roads has facilitated travel throughout the Dominion. It has undoubtedly had an influence upon social and business relations between inhabitants of the country. It has also given new means of access to the summer holiday grounds and to the most beautiful sections of the land. These advantages have been realized in many ways have procured for the Canadian people. These expenditures have also helped to attract visitors in large numbers from the United States. In 1927, 2,153,800 touring motor cars came to Canada from the United States. The travellers in those cars is estimated to have spent \$25,385,150 in this country, as compared with \$203,197,829 that tourists of the kind distributed in 1926. In 1927, 1,937 Canadians visited the United States in 495,929 cars and spent there a total of \$70,000,000, it is estimated. Thus in that year Canada showed a favorable balance of \$200,000,000 in tourist trade.

Importance of tourists from the United States was beneficial to the country in more than one way.

The visitors incurred travelling expenses in Canada and in that way put money into circulation here. Under the tariff law of the United States, it must be returned, each tourist was permitted to carry home with him, free of customs duties, goods to the value of \$100 that were bought in Canada. Many of the tourists availed themselves of this provision of their country's law, and so contributed to the volume of business done last year by Canadian traders. Furthermore, it is probable that many of the tourists helped on their return home to advertise Canada's attractions as a summer resort, its resources and the opportunities it offers for the investment of capital.—Toronto Mail and Empire.

Couldn't Help It

"So your name is George Washington?" the old lady asked the small colored boy.

"Yesum."

"And do you try to be exactly like him, or as nearly as possible?"

"Lak Wha?"

"Why, like George Washington."

"Ah ha! he'll help lak lak Jeshu Washington, cause dat's who Ah is!"

A Dairy Province

Alberta has rapidly become a dairy-province in the last few years. In 1927 her production in this department was valued at \$207,700,000, of which \$5,475,000 consisted of 2,000 pounds of creamery butter and \$161,200 from 849,000 pounds of cheese, the latter being a comparatively new industry.

Getting Out A Paper

Getting out a paper is no picnic. If we print facts, folks say we are silly. If we don't, they say we are too serious. If we publish original matter, they say we lack variety. If we publish things from other papers, we are too busy to write. If we are running news, we are not attending to business in our own department. If we don't print contributions, we don't show proper appreciation. If we do print them, the paper is filled with junk. Like so, some fellow will say we published this from another paper. We did—and we thank him.—Dental Craftman.

CHAMPION CHATTER

VOL. 1

Thursday, Mar. 27, 1928

No. 7

Published in the interests of the People of the Province of Alberta and the Farmers of the vicinity.
GEO. L. DUPUE, Editor.

EDITORIAL
We saw a sign in a restaurant not long ago, "Fred keeps this place." This place keeps Fred. A pleasant sort of proposition. It is a good deal the same way with this business of ours. So far we have managed to keep it, and so far it has kept us pretty average busy. Harry Carter left us in order for a 15-30 McCormick-Deering tractor this week. Power to you Harry.

NIGHT SPIRIT
We like to hear the newcomers, people who have lived in Champion only a short time, speak of it as "Our Community."

Clarence Davis has taken out a standard fanning mill with 8 ft. elevator and a copper

carbonate treater and 10 ft. elevator. Clarence says there's nothing like doing it all at once and early.

Horace Johnson says: "It does not necessarily follow that a man is a fool just because he thinks you are."

J. A. Long is the new owner of a copper carbonate treater.

As we might add to Horace's remark above, that it is better to wait until after April 1st, to make a fool of yourself, and then keep on waiting.

F. S. Racher and H. A. Anderson are recent purchasers of copper carbonate.

A lot of our customers tell us they appreciate the kind of service we give. That makes us feel like giving more.

Jas. Burnett has sold his farm to Oscar Sletto and incidentally we sold another 15-30 h.p.

McCormick tractor along with a 3 furrow P. & O. plow, 28 run McCormick double disc drill and 13 ft. McCormick cultivator. Oscar says it is up to McCormick-Deering.

DIVORCE PUBLICITY
The movie star was heard to say: "In tones exceeding sad, the alimony that I pay is scarcely worth the ad."

Our idea of wasted energy would be a private exhibition of the latest styles in ladies' hose.

We have a new 20 run McCormick double disc front end delivery, power lift drill all set up for your inspection. Come in and let us talk it over.

The community hall idea is taking well and we believe the folks will have something definite to say in this respect soon.

"Good Equipment Makes a Good Farmer Better"

Local and General

H. E. Gill shipped a carload of hogs on Wednesday.

The snow was in excellent condition for snow-balling on Thursday. Let us hope it will be the last of the season.

Canada leads the world in favorable per capita trade balance with a per capita figure of \$20.34. United States comes next with \$3.22.

Note list of household effects to be sold at Jas. Burnett's sale on Monday, April 2nd.

C. D. Brooks has landed in a photo of a Rumely combine in action on a sheet of ice which will be reproduced later for the edification of Chronicle readers.

The photo doesn't show the ice very plainly but C. D. is very emphatic in the assertion that it was there—Two feet of it.

Myriads of ducks and geese are reported on Eight-Mile Lake which has taken on the proportions of a young ocean.

Building operations promise to be exceedingly brisk in town and district during the coming summer.

"Extra Quality that makes its Low Price all the more Amazing"

Of course, you recognize the quality of the New Series Pontiac Six the moment you see it.

In the rich color harmonies of its smart Fisher bodies you find all the distinguishing marks of the quality car.

But Pontiac quality extends far beyond mere outward appearance.

Get in the New Series Pontiac and feel the power of that sturdy six-cylinder engine . . . the easy-riding comfort of the Lovejoy Shock-Absorbers . . . the safe, smooth action of the Pontiac four-wheel brakes. Examine the car in detail. Here are refinements beyond all your expectations of a car at Pontiac price . . . extra quality that makes Pontiac's low price all the more amazing.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

"BUILT TO DO THE WORK"

10 Tractors Farm 5000 Acres!

"I own and operate the New Era Tractor Farm. It consists of about 5000 acres under plow. The largest part of it was plowed when I bought 10 Twin City Tractors in the spring of 1925.

"Those tractors have furnished all the power used in breaking up and farming this land. They have operated with much less than the average expense for tractors doing the same amount of work.

"I have used nearly all makes of tractors, but these Twin City machines pull larger loads for their rating, and do it more days per month without trouble than any I have ever used.

"Would advise anyone, before buying tractors, to be sure and consider the Twin City Tractors."

(Signed) E. M. Young, Prop.

New Era Tractor Farm, McLaughlin, S. D.

TWIN CITY Tractors & Threshers

Twin City Tractors right in your own neighborhood are making just as splendid records for extra power, low upkeep and long life. Follow a Twin City out in the field at work. When it comes to a stretch of stiff going—it walks right on through.

A Twin City will pay for itself on your place by the extra profits it earns. Let us show you. Come in the next time you're in town.
